

## **DESCRIPTION**

These are lithium-base greases having extreme pressure properties. These possess excellent shear stability, high load carrying capacity, high oxidation stability and anti-rust/anti-corrosion properties. These greases prevent welding and seizure of moving parts often caused by shock loading and resist water washout. These greases meet IPSS:1-09-005 specification and are recommended for both plain and anti-friction bearing in a wide variety of application such as automotive, earth moving equipment and general industrial machinery.
