

DESCRIPTION

SERVO GEM HT and HTXX are non-soap based smooth structure greases having excellent ability to withstand high temperature and severe shock load conditions. These have excellent resistance to water washout and do not get affected by mild acids and alkalies. servogem HTXX contains MoS₂ and has high load bearing ability. These greases meet US Steel 372, IPSS: 1-09-008 specifications and are recommended for the lubrication of machine elements, plain bearings and anti-friction bearings operating at high temperatures (120°C - 250°C). These greases meet IS: 12790-1989.
